Terrie, I spoke with James on the issue I mentioned below about one of EPA's air monitoring stations moving. It turns out that we moved our support trailer to a new location, not the air sampler. So, the figure in your draft fact sheet shows the correct locations of EPA's air monitoring stations. Sorry for the confusion.

Sincerely,

Daniel R. Gravatt, PG

Thanks, Dan. We'll hold onto the draft until the final QAPP is approved. I'll let the CAG know.

Good luck with your new position. It has been a pleasure working with you. Thanks for all your document reviews and thoughtful comments.

Terrie

Terrie,

I recommend holding off on finalizing this fact sheet until the PRPs' air monitoring QAPP is approved. Your fact sheet is based on the PRPs' draft QAPP that was included in the IB pre-construction work plan that we posted on our website; however, we have had the PRPs make some revisions to the document, including such things as sample collection frequencies. Once the PRPs' final QAPP is approved we will put it on our website and you can update your fact sheet accordingly.

We've also had to move one of EPA's air monitoring stations due to new fire training activity by the Fire Department; **James**, could you provide Terrie this information?

Sincerely,

Daniel R. Gravatt, PG

Subject: TASC air monitoring fact sheet for review

Hi Dan,

Attached is a fact sheet about air monitoring for the West Lake Landfill CAG. Please let me know if you see any errors. I'll send it to the CAG after I hear from you. We don't have any other pending deliverables for the CAG, and the current technical directive (TD) ends in November. I'll let you know if we receive any requests for additional services from the CAG.

Thanks.

Terrie
